12.4 A Client may cancel Limit Order(s) and/or Pending Order(s) only before such Order(s) has been executed via MT5. Clients cannot cancel Limit Order(s) and/or Pending Order(s) when the relevant Market is closed. Client's instructions might be cancelled only if the Company has not acted upon those instructions. 14. General Trading Conditions

14.1 Only the Client or the Authorized Representative is authorized to give instructions and Orders on the Account (in compliance with Instructions and Orders section of the Agreement).

14.2 Market Hours:

It should be noted that trading of certain Cryptocurrencies and other Financial Instruments occurs during specific time frames, which are provided on the Company's website.

14.3 Price:

Bid – Ask Spread: For any given Cryptocurrency or other Financial Instrument, the Company will quote two prices: the higher price ASK at which the Client can buy (go long) that Financial Instrument, and the lower price (BID) at which the Client can sell (go short) that Financial Instrument; collectively they are referred to as the Firm's price. The difference between the lower and the higher price of a given Financial Instrument is the spread.

The Client hereby agrees that the Company's prices shall be the only relevant prices for the Client's Orders and Transactions.

The Client acknowledges and agrees that the Company is under no obligation to quote any specific price which is quoted in a specific Financial Market.

Any references of the Client to prices of other trading or information systems or of other Clients shall be disregarded. The Company has the right at its sole discretion to increase or decrease spreads on Cryptocurrencies and other

Financial Instruments depending on market conditions and Client's profile. The Client acknowledges that events such as changes in the Financial Markets, news announcements, political and economic events or periods of low liquidity may result in wider spreads. The Client acknowledges and agrees that Spreads may widen at any time and without prior notice and that there is no limit to how wide Spreads may be.

14.4 Order Execution Policy:

The Company shall receive, execute and transmit all Orders strictly in accordance with the Trading Conditions. The Company will have no responsibility for checking the accuracy or the logic of any Order. The Company has the right to refuse to execute the order in compliance with the Refusal to Execute Orders section of the Agreement.

14.5 Types of Orders:

The Company shall provide the Client with an option to place, following order types:

A Market Order which is an order that the Company makes every effort to execute at the best available price (Fill Price). All orders are matched through the Company's order book (Depth of Market), which is visible in the clients' trading terminal. The final price is based on the weighted average price depending on the size of the order. More information are provided in the Company's website under Trading section.

A Limit Order which is an order to sell a financial instrument at no less than a specific price or buy a financial instrument at no more than a specific price. The Client may attach a stop loss and/or a take profit before the order is executed. Once the order is executed it automatically becomes a Market Order and same conditions apply as Market Order.

A Pending Order or an Entry Order which is an order to be executed at a later time and a price that the Client specifies. When the price reaches the price specified by the Client, then the order becomes a market order. Negative and positive slippage applies to pending orders. The Client has the option to place the following pending or entry orders:

A Buy Limit Order, which is a pending or entry buy order placed below the current market price. If the market price drops to the level of the buy order that order is then triggered.

A Buy Stop Order, which is a pending or entry buy order placed above the current market price. If the market price rises to the level of the buy order that order is then triggered.

A Sell Limit Order, which is a pending or entry sell order placed above the current market price. If the market price rises to the level of the sell order that order is then triggered.

A Sell Stop Order, which is a pending or entry sell order placed below the current market price. If the market price drops to the level of the sell order that order is then triggered.

A Trailing Stop Order which is a stop loss order set in terms of points (pips) level above or below the market price. The trailing stop price is adjusted as the price fluctuates.

14.6 Such orders as Buy Limit, Buy Stop and Stop Loss/ Take Profit for opened short positions are executed at the ASK price. Such orders as Sell Limit, Sell Stop and Stop Loss/Take Profit for opened long position are executed at BID price. All orders once triggered are executed as Market Orders at the best available market price.

14.7 Size of Order:

The size of an Order is expressed in lots. The minimum and the maximum order size may depend on the account type and/or asset class and/or particular financial instrument. The Company reserves the right to alter the minimum and/or maximum order size at any given time. A detailed information regarding available order sizes can be found on the Company's Website.

14.8 Costs:

The Client is charged a spread, financing or commission, if applicable, in some Cryptocurrencies and other Financial Instruments depending on the security. Commissions and Financing are not incorporated into the firm's quoted prices but charged separately. A detailed information regarding costs is provided in the Company's website.

14.9 Upon closing a Transaction, and subject to any applicable adjustments for interest and dividends in accordance with this Agreement:

The Company will pay the Client the difference between the price in which the Transaction was opened and the price in which the Transaction was closed, multiplied by the number of units of the Underlying Instrument that comprise the Transaction if the Transaction is:

- (i) a long Transaction and the Transaction's closing price is higher than its opening price; or
- (ii) a short Transaction and the Transaction's closing price is lower than its opening price; and

The Client will pay the Company the difference between the price in which the Transaction was opened and the price in which the Transaction was closed, multiplied by the number of units of the Underlying Instrument that comprise the Transaction if the Transaction is:

- (i) a long Transaction and the Transaction's closing price is lower than its opening price; or
- (ii) a short Transaction and the Transaction's closing price is higher than its opening price.

14.10 Margin Call:

A Margin Call occurs when the Account's equity is about to drop below the margin requirement needed to maintain open Transaction(s). The Margin Call is set at the 150% equity-to-margin ratio. If the equity-to-margin ratio shall continue to drop, a Stop-out may occur.

14.11 Stop-out:

A stop-out Occurs when the account's equity drops below the margin requirement needed to maintain open Transaction(s). If the equity continues to drop, reaching 100% equity-to-margin ratio, MT5 will automatically start closing open positions (starting with those with the highest losses) to prevent zeroing out of the account. The Client should note that a Stop-out may occur even if the Account is fully hedged. When an account is fully hedged, no margin requirement is needed, however the equity is affected by the floating PnL. If the spread widens, the floating PnL will increase. In this case, if floating PnL > equity, account will get stopped out.

When you open a position utilizing all of your funds it means that your margin level % will be near to 100%, which is the Stop out level % set by the Company. The Trading Platform cannot take under consideration the cost of spread before initiating the position, therefore, when the position is opened, and spread is taken into consideration your account margin level % may be equal or drop below 100% causing the stop out to trigger. You are solely responsible to ensure you have sufficient funds before entering into a position.

14.12 It is the Company's policy that the Client's Balance in the Account will never fall below zero. In the event that a Position is closed at such price causing the Equity to fall below zero, the Company shall waive its right to receive the balance from the Client (Negative Balance Protection).

14.13 Slippage:

Due to fast moving markets, all type of Orders as disclosed in the General Trading Conditions section of the Agreement will be executed at prices worse or better due to Negative or Positive Slippage, although the Company will take all reasonable steps to provide Clients the best available price.

It is important to note that Slippage does not affect the Negative Balance Protection and therefore the Client will never lose more than the amount invested (including any profit, if gained), even if a slippage occurs. In addition, transactions in some instruments which are not traded on a 24 hours basis, may experience a Market Gap on a daily basis and are therefore more susceptible to slippage.

14.14 Market Gap:

The Client understands that a Market Gap may occur due to abnormal market conditions and/or as a result of the price difference between the closing and opening price.

In case of a Market Gap, the Company shall execute all pending limit or stop orders at the first available market price for the corresponding position size.

14.15 Suspension:

If at any time trading on a relevant Financial Market or trading in a certain Underlying Asset is suspended, the Company shall suspend the trading in the CFD Transactions based on such Underlying Asset and calculate the value of the CFD with reference to the last traded price before the time of suspension, as reasonably determined by the Company. In the event that the aforesaid suspension continues for five Business Days, the Company may decide, at its sole and absolute discretion, a Closing Time and price of the relevant CFD. During the term of a CFD Transaction whose market is suspended, the Company shall have the right to terminate the CFD Transaction at its discretion, and to amend or vary the requirements.

14.16 Trading Termination

If an Underlying Asset has ceased (or will cease) to be listed, traded or publicly quoted for any reason and is not immediately re-listed, re-traded or re-quoted on the relevant Financial Market or quotation system (including in the event of any insolvency of a company whose shares constitute an Underlying Asset), the Closing Time of the relevant CFD shall be a reasonable time prior to such time in which the Underlying Asset will cease to be listed, traded or publicly quoted and the Company shall close all the relevant Transactions at the Closing Time.

15. Client Money

15.1 The Company will exercise reasonable skill, care and diligence in the selection, appointment and periodic review of the institution/s where Client's funds are deposited. The Company takes into account the credit rating of the institution prior depositing Client Money with the said institution. The Company takes reasonable steps to periodically monitor the credit risk of that institution. The Company may use multiple institutions to ensure diversification and allocate internal percentage limits for each institution. It should be noted, that segregated accounts(s) will be established, maintained and operated.
